

South London Neurosciences Patient Community

(involving families, charities and healthcare professionals to improve services)

**Friday 27th September
11am - 1pm**

Venue:

**ORTUS Conferencing and Events
82-96 Grove Lane, London, SE5 8SN**

All patients, families and other supporters welcome

Do you have or provide support for someone with a neurological condition?

Have you had neurosurgery or provided support for someone who has?

Have you or someone you support used neuropsychiatry services?

Do you want to help improve services?

We want to develop a neurosciences group and by getting involved we hope to be able to make a difference in the future.

This will be an opportunity to:

- meet others and hear about their experiences
- discuss how support could be improved after receiving a diagnosis or being discharged from hospital
- share ideas on what this group should focus on.

If you are interested in attending or would like more information – please get in touch with:

Sharon Wellington

Project Manager

King's Health Partners Neurosciences
